## Traffic Alert

October 29, 2019

### Lane closures begin Wednesday on S.R. 67 bridges over Little White Lick Creek in Mooresville

MORGAN COUNTY, Ind.— INDOT contractor Force Construction will start work on a \$4.1 million superstructure replacement project on the S.R. 67 bridges over Little White Lick Creek in Mooresville on Wednesday, October 30, weather permitting.

S.R. 67 will be reduced to one lane in each direction as crews begin performing temporary shoulder widening. This traffic pattern will remain in place for the duration of the project. Crews will complete demolition of existing bridge spans during the winter months and begin concrete pours in the spring. Concrete patching and joint repair are also planned for both bridges.

The project is beginning this construction season to be completed prior to the full closure of S.R. 37 expected in 2021 for mainline I-69 construction. The entire superstructure replacement project is scheduled to be complete next fall.

Motorists should slow down, use extra caution and drive distraction-free through work zones. Due to the project's close proximity to a railroad crossing, drivers should also avoid stopping on the tracks.
